

## Sprint Mobile Broadband USB Modem by Novatel Wireless Ovation™ U727 MAC OS® X: Quick Start Sheet

---

Detailed instructions on installation, activation, and basic information on using the device are in the digital (.pdf) Mac Quick Start Guide that is located on the Installation CD. You may also find the Mac Quick Start Guide online at: [www.sprint.com/downloads](http://www.sprint.com/downloads).

### 1. Setup an account with Sprint

You will need an account with Sprint in order to activate and begin using your device.

- If you will be using your device primarily for business purposes, call **1-888-788-4727**.
- If your device is intended primarily for personal use, call **1-888-715-4588**.
- Advise Sprint Customer Service that you are preparing to set up an account for the Sprint Mobile Broadband USB Modem by Novatel Wireless Ovation U727 for use on a Mac.
- Once you have set up the account with Sprint, you will be provided a few numbers that you should write down and keep handy since you will need them for activation.
  - Sprint Device Phone Number (MDN)
  - An MSID
  - An MSL

### 2. MAC OS X: Install the Mac Package located on the Installation CD.

\*The Mac package is also available as a download at [www.sprint.com/downloads](http://www.sprint.com/downloads)

- Follow the onscreen prompts to install the drivers.
- Open **Finder**, go to **Applications**, and locate the **Sprint Activation Utility**. Enter in the information provided to you when you set up your Sprint service.

### 3. Connect to and Disconnect from Sprint Mobile Broadband

Connect and Disconnect Sprint Mobile Broadband using the native Internet Connect software that is built into the Mac.

- Go to the Phone icon menu located on the Finder navigation bar at the top of your desktop and click **Connect** or **Disconnect**.
- If you do have a Phone icon menu, go to **Finder > System Preferences > Network** and select "Novatel Wireless CDMA" from the **Show** pull-down menu and click **Connect** or **Disconnect**.
